

Capacity Building program Open to-public Webinars

The AfriEvolve partnership consortium invites you to join 16 learning sessions organised in 3 webinar series with focused thematics

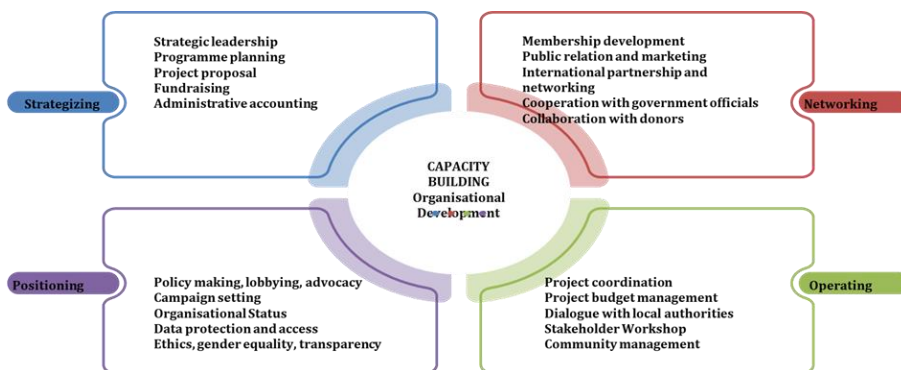

- 7 sessions-serie on Climate Smart Agriculture #CSA
- 6 sessions-serie on Organisational Development #OD
- 3 sessions-serie on Nature Conservation #NC

AfriEvolve conceives a regional southern-driven cooperation platform facilitating peer-to-peer & mentoring exchanges of knowledge, skills and resources in order to emulate equal-mutual capacity building and political empowerment among the partners and here, by upscaling the experience, among green African cooperation actors.

Audience targets

The program addresses the 3 thematic matters from a technical perspective for green African Non-Governmental-Organizations. Individuals who would benefit from taking the learning include various level of responsibilities and roles (see graphic below) and each session is then designed for some of those specific functions.

Co-learning objectives

The participants will learn either about Organisational Development supportive principles, Climate Smart Agriculture innovative skills or Nature Conservation implementing expertise. The learning content of the sessions is step by step designed to tailor the project partner needs and is communicated at least one week prior to the event.

About AfriEvolve

AfriEvolve is a 3 year duration project enabling 3 local NGOs in East Africa and 3 local NGOs in West Africa to develop and then upscale newly gained capacities for improved civil society cooperation and climate adaptation of smallholder agriculture in the 6 following pilot sites: Yala Delta in Kenya, Echuya Forest Reserve in Uganda, East Usambara Forest in Tanzania, Sourou Valley in Burkina Faso, Azagny National Park in Côte d'Ivoire and the Mognori region in Mole National Park in Ghana.
